

Care for Computer Hardware

ACTIVITY ONE:

Create a poster about how to install, use and maintain a basic computer printer, such as PIXMA MP240. The poster is to include the following:

- Diagrams / pictures
- Simple words, so that year 8 students can use
- Manufacturers requirements
- List of ideal working conditions
- Replacing ink cartridges
- Warranty conditions

ACTIVITY TWO:

1. Show the precautions need when moving computer equipment.

Hint: include a caption under the image

2. Find pictures of how to store computer parts, peripherals and media?

3. Clean your computer, such as removal of dust and grease. Take a photo of this process.

Insert pic.

<INSERT NAME>

ACTIVITY THREE:

1. What system protection do you have on your home computer or on the computer you are currently working on?

2. How often do you run these system scans?

3. Take photos of you performing a routine system scan, such as disk defragmentation or virus scan, on the computer.

HINT: You may complete this activity at home or use your teacher computer.

ACTIVITY FOUR:

Having completed all the activities in “Following Workplace Safety Procedures”, both Ms Watt & Miss Foukas, have presented your finding to Mr Jones. Since you have done such a great job Mr Jones has asked for you to come up with a solution to fix I block issues. Create a pamphlet in Publisher outlining your solutions.

HINT: Remember to keep in mind that we have a very low budget, limited resources and environmental conditions.
